

HEOS SUBWOOFER

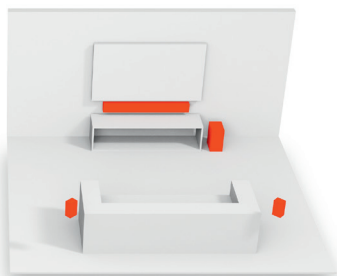

BOOST THE BASS.

The HEOS Subwoofer adds seismic bass to all your sound - wirelessly. With its powerful amplification and optimised drivers, this wireless subwoofer works with the entire HEOS range, from any HEOS speaker to HEOS Bar, HEOS AVR, HEOS Amp and HEOS Link.

2.1 speaker setup

5.1 speaker setup

ALWAYS A PERFECT MATCH.

You can combine the HEOS Subwoofer with another wireless HEOS speaker to give your sound more depth. Alternatively, you can pair it with the HEOS Bar and two HEOS speakers as rear channels. You'll get a fully wireless 5.1 cinema surround sound experience.

CLEAR AND DISTINCT BASS.

Two custom-made 5-1/4inch drive units in combination with sophisticated class D amplification deliver clean and clear, yet punchy bass. The proprietary DSP algorithms of the HEOS Subwoofer provide optimised low frequency response across the entire dynamic range. Within the HEOS App, you will find advanced settings for different configurations, like the dialogue enhancer and night mode features, which are integrated in the HEOS Bar. If used together, this wireless subwoofer automatically adapts to your settings.

PERFECT SOUND MADE SIMPLE.

Setup of the HEOS Subwoofer takes a matter of minutes. Simply connect it to your home network and any other HEOS devices and you can experience dramatic bass instantly. Control all your sound via the HEOS App. It's really as simple as that.

KEY FEATURES

- Dual Custom 5-1/4 inch drivers and sophisticated, high power Class D amplification
- This wireless subwoofer can be combined with HEOS Bar, HEOS AVR, HEOS Amp, HEOS Link and any HEOS speaker (single or stereo pair)
- Connect to your wireless network quickly and easily. HEOS Bar supports the latest 802.11 networks (including dual band „N“, „AC“) for the most reliable network connection
- Factory-optimised crossover option for each configuration
- Built-in HEOS network technology for access to the most important online streaming services, and stunning multi-room experience with other HEOS products
- Advanced settings like crossover and phase for advanced users
- Supports all major streaming formats, including high resolution audio: DSD (2.4, 5.6 Mhz), FLAC, WAV, ALAC (192 / 24), MP3, WMA, AAC File Playback (USB / Network)
