

**D-M40****MICRO COMPONENT CD-RECEIVER SYSTEM**

THE D-M40(DAB) CD-RECEIVER SYSTEM OFFERS FAMOUS DENON SOUND QUALITY AND MODERN CONNECTIVITY IN A COMPACT CABINET

Stepping into the footprints of multi-award winning D-M39, the new D-M40 features serious Hi-Fi quality CD Receiver RCD-M40 along with optimized two-way speaker system SC-M40. For almost 20 years now, Denon's M Series has been developed to meet the needs of modern day audio enthusiast that want a micro size stereo system but with the least compromises on sound and build quality. The latest

development comes with improved connectivity options such as two digital optical inputs to hook up a TV, set-top box or other digital gear that deserves improved audio quality. Of course it plays all sources like CD, FM (and DAB/DAB+ in D-M40DAB version) radio or USB media including iDevices in impeccable quality too.

“Simple & Straight” circuit design for sound purity and free of colouration

Denon’s popular M series gives you high sound quality based on the “simple & straight” concept. Circuitry is uncomplicated, signal paths are short, and all adverse influences on sound quality have been minimised. The circuit design and the way the chassis is built ensure that the sound you hear is utterly faithful to the original performance.

Triple noise reduction design to preserve signal purity

In an audio component where various circuits, boards, and wire layouts can influence each other, it is not possible to obtain satisfying specifications or sound simply by strengthening the power amp circuit. Denon has therefore eliminated three sources of noise to ensure that the sound is as clean as possible. Distortion from the input selector, electronic volume and power amp has been suppressed to improve the signal-to-noise ratio and produce an even smoother, dramatic sound.

KEY FEATURES [NEW]

- Updated cosmetic design
- “Simple & Straight” circuit design minimizing distortion from the input selector, electronic volume and power amp for sound purity and free of colouration
- Triple Noise Reduction Design (T.N.R.D.) to preserve signal purity
- High quality headphone amp with gain control
- Digitally transmitted audio from iPod and iPhone (via USB) for best sound quality
- iDevice charging even in standby mode
- USB port supports MP3, WMA, **FLAC, WAV and AAC**
- 2 optical digital inputs for amplified TV playback or other digital gear
- Speaker Optimizer circuit for high quality sound with SC-M40 speaker system
- High Quality Speaker Terminals
- Easy-to-use remote control handset

Direct play for iPod and iPhone via USB

You can also listen to music files from your iPod by simply connecting it to the USB port with the USB cable that came with the iPod. Digital signals from the iPod are transmitted as is to the D-M40 and are processed by advanced audio circuitry to produce a clean, high-quality sound. Moreover, the D-M40’s USB port is not only capable of playing MP3 and WMA files, but also lossless FLAC, WAV and AAC.

Enjoy premium sound in your home office, bedroom, or any other room

The compact size of 210mm width and just 310mm depth (plus speakers) allows for an easy setup of the D-M40 on a bookshelf, in a bedroom or in the home office. With several colour combinations, it easily blends into people’s daily life, delivering impeccable performance at the same time.
