# **M&K SOUND Introduces upgraded living room friendly compact V10+ subwoofer - available now**

**M&K Sound is proud to announce the availability of the brand-new Compact V10+ subwoofer, an upgraded version of the small-footprint and living room friendly V10.**

The V10+ delivers an opportunity for consumers to enjoy that legendary deep and accurate bass for which M&K Sound is world-renowned in a compact and affordable package. The new subwoofer allows a wider audience to experience 'The Choice of Professionals' and listen to movies and music the way they are meant to be heard.

***The Choice of Professionals<sup>®</sup>***

The manageable form factor of the beautifully designed V10+ (available in black satin or white satin finishes) with new curved cabinet design means it can be placed almost anywhere in a residential or office environment without drawing attention to itself. Feel those rumbles without the clutter!

## **More features, exquisite design and powerful, enhanced performance**

M&K Sound's expert engineering team has increased the amplifier power output for the V10+ from 200W to 300W RMS and extended deep bass output from 25Hz down to a growling 20Hz (-6dB).

A single 10-inch driver with newly treated paper cone in a sealed anti-resonant enclosure - combined with a high-efficiency Class D amplifier and M&K's proprietary 'front end' input stage - ensure that the signature bass performance is not just heard by the audience, but viscerally felt.

M&K Sound's Compact V10+ Subwoofer sports a brand new curved and tapered external housing with tastefully formed embossed logo, making this discrete powerhouse of deep bass ideal for placement within any décor-friendly or design-conscious environment.

Combined with a newly developed and magnetized front grill, which can be easily removed and replaced, the V10+ represents an unrivaled ergonomics and performance package for movie fans, audiophiles and casual listeners alike.

## New V10+ subwoofer features and enhancements over first-gen V10

---

- Increased amplifier power output from 200W RMS to 300W RMS
- Deeper bass extension down to 20Hz from 25Hz
- Wider frequency response of 24 – 200Hz (+/- 2dB)
- New treated stiffer paper cone design for rigidity and reduced distortion
- Anti-resonant and exquisitely crafted curved cabinet while retaining 'cubic' dimensions
- Convenient magnetic attachable grill for cleaner aesthetic and easier fit

*Look out for our forthcoming announcement of the upgraded V12+ and V15+ subwoofers with THX Certification and full remote control app*

---

## New V10+ subwoofer core specifications

---
