Direct Energy HD Amplifier

The Direct Energy HD (High fidelity class D) Amplifier based on Pioneer's Multi-channel Stereophonic Philosophy is capable of simultaneous high-power. With the Direct Power FET directly connected to the print circuit board without any wiring, you can enjoy quality sound, quick response, and high efficiency, as well as save energy. The custom bypass capacitors further enhance the advantages of the Direct Energy HD amplifier, producing powerful bass while also featuring gentle expressiveness. The Direct Energy HD amplifier is ideal for reproducing the latest HD content encoded by Dolby Atmos or DTS:X and high resolution audio.

MCACC Auto Room Tuning

Create the optimum acoustic environment with Pioneer's MCACC (Multi-Channel Acoustic Calibration System), developed with the expertise of professional recording studios. With the custom microphone, the system automatically compensates for differences in speaker size, level and distance, and equalises response.

Synchronised Sound with Phase Control

As an innovative solution for the phase lag between the subwoofer and the main channel speakers caused by the bass management filter, Phase Control compensates the delayed bass to improve sound synchronisation.

Dolby Atmos and DTS:X

Dolby Atmos and DTS:X formats liberate sounds from specific speakers, allowing them to move from speaker to speaker, and even overhead. The next-generation audio codecs leverage object-based audio to enable new immersive and interactive audio performance. Whether it is movies, music, or games, you can enjoy a totally new experience that unleashes overwhelming realism in your home cinema.

Reflex Optimizer

High directivity sound reflects off the ceiling, while low directivity sound directly reaches the ears. This difference causes a phase shift, making the sound feel uncomfortable. To solve this, the new technology optimizes the performance of your up-firing elevation speakers for your listening environment, by aligning the phase of direct and indirect sound, matching the basic tone, and optimizing the upward-oriented frequencies. The result is overall seamless sound with Dolby Atmos enabled speakers, allowing the ideal reproduction of three-dimensional surround sound.

Next-Generation Video Standard Ready

The SC-LX502 supports pass-through for Dolby Vision, HLG (Hybrid Log-Gamma), and HDR10 signals. By connecting a compatible source device, you can enjoy these latest video standards on a compatible display. What's more, all HDMI terminals support 4K (60p/4:4:4/24-bit*), Wide Colour Gamut (BT.2020), and HDCP 2.2, so you will have no problem when upgrading to new devices, and can also enjoy premium content such as 4K videos with digital copy protection.

* 4:4:4/24-bit signal is not supported via front terminal.

Chromecast built-in

The SC-LX502 comes with Chromecast built-in, so you can use your mobile device to stream your favourite music, radio, or podcasts to your speaker. You can control the audio from anywhere in the house using Chromecast-enabled apps running on your personal device—iPhone, iPad, Android phone and tablet, Mac and Windows laptop, and Chromebook™. Discover Chromecast-enabled apps at google.com/cast/apps.

DTS Play-Fi®

DTS Play-Fi® wirelessly streams any audio content from any compatible mobile device to the SC-LX502 and DTS Play-Fi compatible audio systems, creating a multi-room system in your home. You can stream different sources to different speakers at the same time from the Pioneer Music Control App.

* DTS Play-Fi will be available with firmware update.

Multi-room Audio Offers a Variety of Ways to Enjoy Music

FlareConnect™ shares audio from network and external audio input sources between compatible components. Enjoy effortless multi-room playback of LP records, CDs, network music services, and more with supported components and speaker systems. Music selection, speaker grouping, and playback management across the home are built into the Pioneer Remote App**.

* Sharing audio from external inputs is enabled with a future firmware update. External audio inputs supporting FlareConnect may differ depending on model. Please consult individual product specification for more information.
