# SVS Prime Wireless Speaker System

## Immersive Audio Goes Wireless & Multi-Room

- » 2 separate speakers provide true stereo separation for more immersive and natural sounding music
- » 192KHz/24-bit DAC for pristine high resolution digital signal path
- » 200-watt amplifier delivers massive 50 watts to each driver for effortless power and room-energizing dynamics
- » Amazon Alexa smart compatibility for voice control of music
- » 6 custom presets allow instant access to your favorite streaming music services and playlists, or your favorite internet radio stations, without needing your smartphone
- » Sophisticated digital crossover renders perfectly tuned output and commanding bass by optimizing power from the 50-watts per driver amplifier. The result is explosive dynamics and revealing clarity from a compact, stylish and acoustically refined cabinet
- » DTS Play-Fi enabled for multi-room multi-zone wireless audio streaming

## High Fidelity Sound for the Modern Audiophile.

Until now, the smart wireless speaker category has been dominated by products that force you to sacrifice great sound to achieve convenience and advanced connectivity. SVS is changing the game.

The SVS Prime Wireless Speaker System is a perfect fusion of intelligent controls, trailblazing features, unmatched connectivity options and most importantly, immersive, reference quality sound. All the benefits of a wireless powered smart speaker with uncompromising acoustic design and performance. Finally, a wireless speaker that truly rocks.

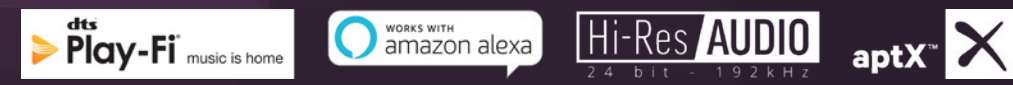

## Unparalleled Wireless Smart Speaker Versatility.

Thrilling and immersive sound from all your favorite music streaming sites and high resolution audio files is easier than ever with the SVS Prime Wireless Speaker System. Use it as a two-channel stereo system, connect directly to a TV, stream from your phone or tablet via Bluetooth or WiFi, create a desktop system with a laptop/PC, use in a multi-room, multi-zone audio system, or just put it anywhere you want to enjoy high resolution music streaming.

Plus, you can control it all from the DTS Play-Fi smartphone app, the front panel, or start your music with your voice through an Amazon Alexa device. Captivating sound quality with useful versatility and smart speaker simplicity, SVS invents the hi-fi system of the future.

## One-of-a-Kind Connectivity & Control

- » Use the DTS Play-Fi app to control your music from any smartphone or tablet and distribute it throughout your home
- » Control your music with your voice via Amazon Alexa devices
- » Optical and line level inputs for TVs, gaming consoles, CD players, turntables, PCs and more
- » Subwoofer output allows easy connection to your favorite SVS subwoofer for deeper bass and a more thrilling and immersive experience
- » Bluetooth with aptX and AAC for high fidelity wireless audio streaming from your smartphone or tablet
