

SVS SoundPath Speaker Level Subwoofer Adapter

Thank you for choosing SVS. The following instructions will assist you in connecting and using the SoundPath Speaker Level Subwoofer Adapter. More information and details can be found at: www.svsound.com/products/soundpath-speaker-level-subwoofer-adapter

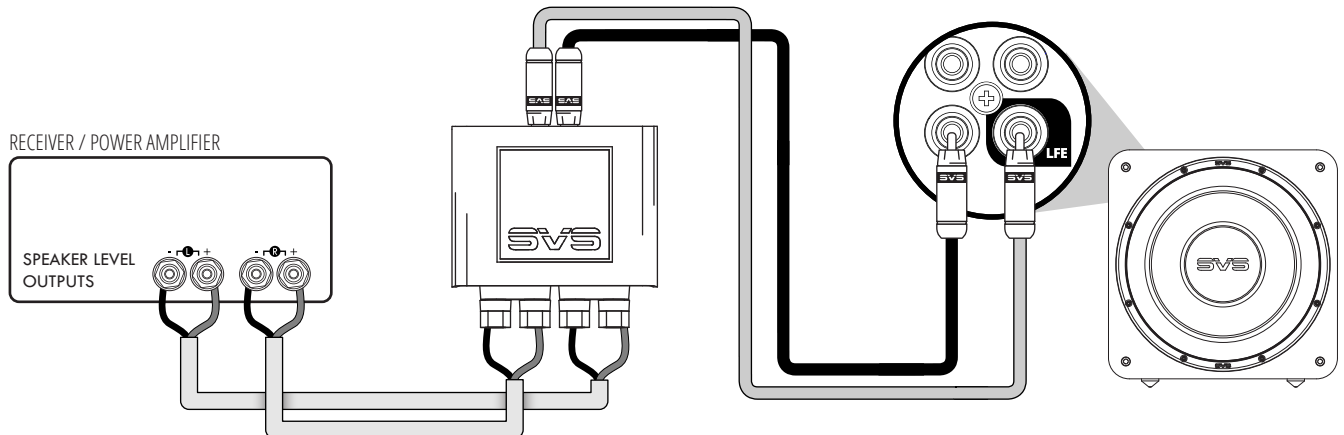

Connecting to a Receiver or Amplifier

- Make sure all connected components are switched off.
- Connect the Positive and Negative speaker level connections from the Left and Right speaker outputs of your Amplifier or Receiver to the corresponding binding posts of the SoundPath Speaker Level Subwoofer Adapter.
- The binding posts accept bare wire, banana, or spade connectors. Be sure to follow the correct channel and polarity markings.
- Your adapter will power on as soon as it's connected to the AV receiver or amplifier.

Connecting to a Subwoofer

- Using a conventional RCA (Line Level) cable, connect the RCA outputs of the Adapter to the RCA inputs of the subwoofer.
- You may now power-on other electronics in your system.

NOTE: This product is not recommended for use with Differential Amplifiers. These types of amplifiers are very rare, but if you are unsure, please contact us.
